

SAKSHAMI SINGH

Frontend Developer | Software Engineering Student

Profile

Highly motivated Frontend Developer and B.Tech student at GGSIPU with a focus on building interactive, user-centric web applications. Proficient in React.js and Vite, with a proven track record of developing functional prototypes like ShieldOne and AirPin. Passionate about bridging the gap between complex logic and seamless user experiences through clean code and responsive design.

Education

Bachelor of Technology Computer Science & Engineering Guru Gobind Singh Indraprastha University (GGSIPU) 2024–2028

CGPA: 6.9/10 (Cumulative
through Semester 3)

- **Relevant Coursework:** Data Structures, DBMS, Java Programming, Theory of Computation, and OOP (C++).

Class XII (CBSE)

Butler Memorial Girls Senior
Secondary School

2023–2024

Class X (CBSE)

S.D Public Secondary School

2021– 2022

Technical Skills

- Languages: JavaScript, Java, C++, HTML5, CSS3
- Libraries & Frameworks: React.js, Vite, Node.js
- Backend & Databases: Firebase, DBMS
- Tools & DevOps: Git/GitHub, Surge CLI, VS Code, Postman
- Core Fundamentals: Data Structures, OOP, Theory of Computation
- Design & UI/UX: Graphic Design, UI/UX Principles, Responsive Web Design

Technical Experience

ShieldOne

Emergency Safety Platform

- Engineered a responsive safety application using React and Vite, integrating automated SOS triggers and real-time movement analysis logic.
- Optimized front-end performance for rapid emergency response, ensuring a seamless user experience across devices.

AirPin

Social Utility Platform

- Collaborated on a community-driven project using React and GitHub for team-based version control and feature integration.
- Contributed to building interactive UI components designed for high user engagement and real-time data visualization.

ChronicCare

Healthcare Management Tool

- Architected a full-stack solution utilizing Firebase (Authentication & Firestore) for secure user data management and real-time medication tracking.
- Developed complex logic to calculate medication adherence scores and risk levels for actionable healthcare insights.

Deployment & Workflow

- Managed the full development lifecycle, from local environment setup to live production using Surge CLI.
- Resolved complex deployment bottlenecks and environment errors to ensure seamless project delivery during high-pressure hackathon deadlines.
