

# Lakku Pavan Kumar Reddy

Senior React Developer & OMNI POS Specialist + Hyderabad #

pavankumarlakku73@gmail.com , +91 7095458535 o LinkedIn

## Professional Summary

Senior React Developer with 5.5+ years of experience in building and optimizing enterprise-level web applications. Proven expertise in enhancing application performance, as demonstrated by reducing page load times by 40% through efficient coding practices and implementing code-splitting techniques. Proficient in the React ecosystem, including Redux, React Hooks, and TypeScript, and skilled in translating complex UI designs into high-quality, pixel-perfect, and accessible user interfaces. Adept at collaborating with cross-functional teams in Agile environments to deliver scalable solutions and mentor junior developers on best practices.

## Experience

### Senior UI Developer

Cogizant (Contract to Verizon)

Hyderabad

Nov 2021 – Present

#### - Assisted Sales (UI)

**Omnichannel Expertise:** Orchestrated UI enhancements across the Assisted Sales ecosystem, including the **Landing Portal**, **Ordering modules**, and specialized **ETR (Express To Retail)** flows.

**Key Integration:** Led the UI implementation for the **Best Buy Local Order** channel, enabling seamless device sales and Verizon service activations within third-party retail environments.

**Production Excellence:** Actively maintain system stability by identifying and resolving high-priority production defects and performance bottlenecks.

**Technical Troubleshooting:** Utilize **Kibana** for deep-dive log analysis and API debugging, ensuring robust communication between frontend interfaces and backend services

### Junior UI Developer

SKUOPS

Bangalore

May 2020 – Oct 2021

◦ **Core Feature Development :** Engineered the mission-critical scheduling interface—the full-calendar module—using specialized **JavaScript Calendar** libraries to handle complex **Daily Scheduling and Quarterly Call Assignments**.

**Data Visualization:** Developed comprehensive Executive Dashboards, utilizing modern CSS and framework components to display complex operational data clearly.

**Communication Tools:** Built out Chat UI interfaces, focusing on real-time responsiveness and intuitive user flow.

**Security & Access Control:** Architected and implemented Role & Permission management pages, enabling granular administrative control over system access.

**Process Automation:** Engineered Workflow pages to visualize and manage multi-step business processes, improving internal efficiency.

## Projects

## BestBuy Local Order

- **Local order Integration** : I built the interface for the 'Local Order' platform, a specialized tool that empowered Verizon representatives to sell and activate devices seamlessly. My work focused on bridging the gap between Best Buy's retail ecosystem and Verizon's service activation flow. .

## Ordering System

- **ProsetUp** : Spearheaded the "Setup and Go" to ProSetup rebranding within the Ordering flow, implementing a "Soft SKU" model that enables customers to purchase expert device setup. This initiative streamlined the retail service offering and drove incremental service revenue through a seamless UI integration.

## Omni-Channel Point of Sale (ETR) Application

- **CTA** : Implemented Click-to-Action (CTA) tiles within ETR, utilizing a "Highest Offer" logic to dynamically surface personalized, priority-eligible deals for customers. This functionality significantly optimized the conversion funnel by enabling one-click purchasing and reducing overall transaction friction.
- **Authentication Mdn Transfer** : Engineered Adaptive Authentication for the Postpaid-to-Prepaid conversion flow, ensuring secure identity verification during account migrations. This implementation fortified the MDN transition process while maintaining a friction-free experience for customers and reps. .

## Landing Portal.

- **Size Selection** : Optimized the Quick Accessory Flow on the Landing Page, enabling customers to bypass Adaptive Authentication for a faster checkout experience. Integrated size and color selection logic directly into the flow to ensure a seamless, friction-free purchasing journey.
- **TypoHead** : Implemented a predictive address autocomplete feature that dynamically suggests locations based on representative input. This functionality automates field population for street and city data, significantly increasing data accuracy and reducing manual entry time.

## Skills

- **Core Fundamentals**: Crafting responsive, accessible web structures using **HTML5**, **CSS3**, and **ES6+ JavaScript** within **VS Code**.
- **React & Next.js**: Building modular UIs with **Hooks**, **useReducer**, and **Next.js** for efficient server-side and static site rendering.
- **UI Frameworks**: Expertly implementing polished designs using **Material-UI (MUI)**, **Bootstrap**, and **Ant Design** for rapid development.
- **State & Monitoring**: Managing complex logic via **Reducers** and utilizing **Kibana** for basic log analysis and data visualization.
- **Version Control**: Streamlining collaborative workflows and maintaining codebase history through proficient use of **Git**.

## Education

**Bachelor of Engineering, ECE KSRM college of  
Engineering, kadapa, Andhra Pradesh**

*Sept 2014 – May 2018*
